<https://github.com/kareem-kamel>

I have been practicing software industry for 2 years.

## Education

High School Degree

GPA 3.2/4.0 2018-2020

Computer Science Bachelor Degree (Cyber Security) – E-JUST

2023-2026

- At CS Club, I Delivered educational sessions to fellow students on frontend development topics, including HTML, CSS, JavaScript. These sessions aimed to enhance students' skills in building responsive and interactive web applications.

## Experience

Ai models training – Chat bot

February 2023 – April 2023

- I embarked on a comprehensive journey to train an AI model and enhance my skills in prompt engineering, aiming to master the creation and refinement of prompts to improve AI interactions.

Volunteer– Egyptian Food Bank

January 2024 – February 2024

- Assisted in sorting and packaging food donations, distributing food, and organizing fundraising events

## Projects

- Real State: throughout this data science project, I explored a real-world real estate dataset to perform data preprocessing, create insightful visualizations using Power BI, and apply various machine learning algorithms for both classification and prediction tasks.
- Task manger: In this frontend project, I developed a dynamic to-do list application using HTML, CSS, and JavaScript. Users can efficiently manage their tasks, set deadlines, and track their progress. The app features a user-friendly interface designed to enhance productivity and ensure a seamless task management experience.
- Personal info: Developed an Android application using Android Studio that allows users to input, manage, and display their personal information.
- Hospital Management System: Developed a hospital management system using Python and Object-Oriented Programming (OOP) principles. The project was designed to manage patients and doctors efficiently, including functionalities for patient registration, appointment scheduling, and doctor assignments.

## Technical Skills

- **Programming Languages**: Python, JavaScript, HTML,CSS, Java, C++
- **Mobile Development**: Android Studio
- **Data Visualization**: Power BI
